TERMS

PROVISION OF SUPPLY

This affects two companies: the network company and the energy retailer. The two companies require time to complete their respective procedures and to set up connection details. If a connection point is available at the site, fifteen working days should be allowed for the connection to be made.

If a connection point does not exist allowance must be made for construction work. Timeframes for this will be given to the applicant by Unison The Powerlines People.

FINANCIAL CONTRIBUTIONS

These will normally be required for each connection to Unison's network. The applicant will be advised of the contribution required and must give Unison authorisation in writing to proceed with the provision of a network connection point. The connection will not proceed until authorisation is received by Unison. Details of Unison's Financial Contributions Policy are available on www.unison.co.nz.

INFORMATION GIVEN ON APPLICATION

It is vital that all panels on this Application Form are completed fully by the customer and the electrician. This will avoid delays and assist both the energy retailer and Unison. Application forms will be returned, and full information requested, if the information supplied is inadequate to progress the connection.
