

Your Arborist

Your Arborist. Unison Contracting Services.

Why use Unison Contracting Services?

- Our expertise, experience and equipment range is suited to jobs big or small
- We employ certified arborists with many years of experience
- We are specialists in complex and difficult tree situations
- We are certified to work around power lines
- We customise cost effective work packages for term based maintenance contracts
- We work with you to ensure all of your expectations are met
- We have public liability insurance
- We are community owned and operated

Fleet and Equipment

Our fleet of vehicles, with long reach Elevated Working Platforms (EWP), facilitate fast and cost effective solutions for trimming or felling trees. Safety is always ensured when working in close proximity to live power lines, which enables us to carry out all close-approach work safely and efficiently.

Our EWPs have the longest reach in the region (over 18 metres), which gives us an advantage over other companies, through enabling safe working conditions in difficult locations, minimising access problems, and facilitating the safe lowering of large tree parts to a suitable area for cutting or chipping.

We have a range of the latest chainsaw equipment, from long-reach chainsaws to long-blade saws for exceptionally large trees. Using these methods and practices allows us to work quickly, with minimal disruption and disturbance.

Traffic Management

Unison Contracting Services is fully certified to implement any traffic management requirement.

Safety First

On all of our work sites, safety is always our highest concern. Our employees are trained to implement the highest safety standards to protect both the public and themselves.
